

QUICK TOOLS TO EXPLORE EARTH SCIENCE CONCEPTS

Our mission is to help you picture climate and environmental changes as they occur on our home planet.

NASA EARTH OBSERVATIONS AT YOUR FINGERTIPS

Use the *NEO Analysis* tool to explore the Earth system. For examples on how to view and investigate satellite data, including links to short ClimateBits videos with background information, visit: <https://neo.sci.gsfc.nasa.gov/blog>

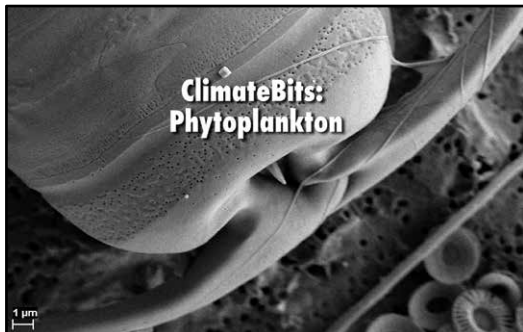

EXAMPLE ANALYSES

NEO Analysis in 10 Easy Steps: <https://go.nasa.gov/2xQB7vt>

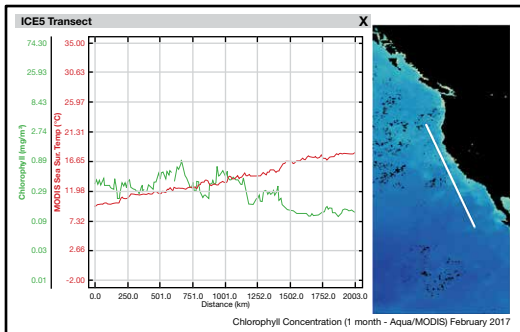

Analysis: Pacific Life—How is it Related to Ocean Temperature?:
<https://go.nasa.gov/2yoH7ME>

Analysis: Hot in the City: <https://go.nasa.gov/2xQE27s>

Analysis: Reflections on the Blue Planet:
<https://go.nasa.gov/2xQI29o>

Example of a ClimateBits video that explains phytoplankton and their distribution in the ocean.

Comparison of sea surface temperature and chlorophyll concentrations.
